CONTINOUS DATA INTEGRATION SIMPLIFIED

REAL-TIME DATA IS A NECESSITY AS YOU MODERNIZE

Leading players across industries leverage real time data to drive competitive advantage, new revenue streams and gain data driven insights.

However, most organizations today still struggle with:

- Insufficient legacy data integration tools
- Yesterday's data feeding analytics & BI
- Heavy manual interventions - too much code
- Growing Data Silos
- Mounting demands for data across the business

How can you modernize effectively with these roadblocks to real time streaming?

Equalum's continuous data integration platform is the **only solution** that natively supports all data integration use cases under one, unified platform with zero coding.

Real Time, Continuous Streaming ETL / ELT / EtLT

Fully orchestrated, drag and drop, no-code UI enables real time streaming, rapid deployment, powerful transformations and scalable data pipelines.

Multi-Modal Change Data Capture (CDC)

Modern, robust and scalable CDC enabling Real-Time Streaming and Data Replication. Tuned for best in class performance no matter the source or target.

Spark & Kafka Built into the Platform Engine

The power of an open source framework without the hassle of configuration and time intensive management.

Deploy On-Prem, On-Cloud, Hybrid or SaaS

Equalum offers total flexibility with deployment, supporting your modernization and helping avoid vendor lock in.

equalum.io

KEY BENEFITS

Unified Platform
Streaming ETL, Change Data Capture, Batch ETL and Replication in a single solution

Simple / Ease of Use
No-code UI, rapid deployment, infinitely scalable plus drag and drop flows canvas

Flexible
Deploy on-prem, SaaS or in hybrid environments. Add custom code where desired.

Numerous Application Level Sources
SAP ECC, SAP Hybris, Salesforce and more available with Equalum

Best In Class Performance
Kafka & Spark under the hood, next-gen Streaming Transformations and comprehensive CDC library

Cost Efficient
Reduce multiple licenses for Data Integration tools with a single solution. Transformations in pipe reduce Cloud compute costs.

Enterprise Grade
Fully orchestrated, auto healing, and trusted data across your business
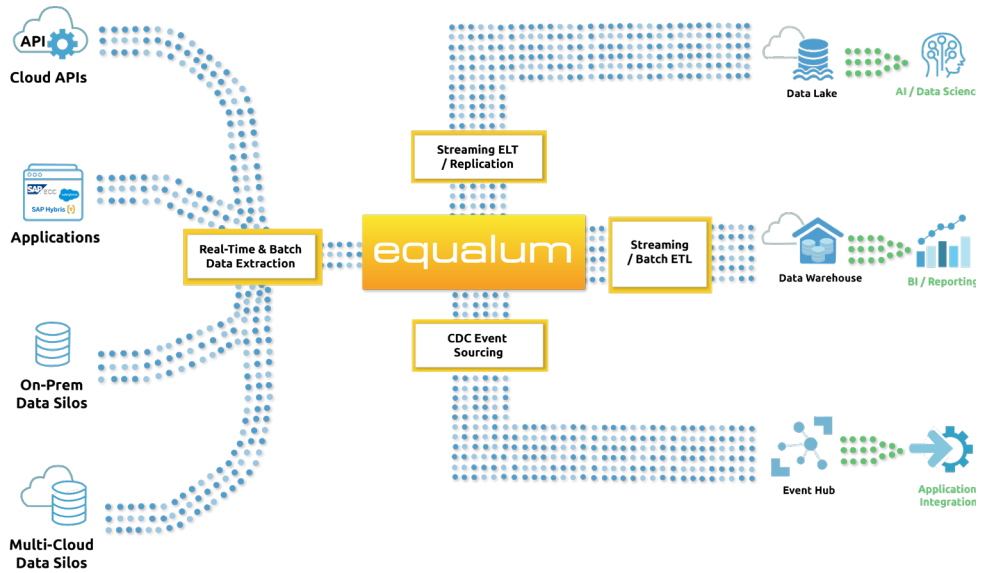

UNIFIED DATA INTEGRATION MADE SIMPLE

Equalum can be deployed with your first use case implemented and ready for use **within an hour.**

TAKE ADVANTAGE OF EQUALUM'S:

- ✅ Drag & Drop Flows Canvas for rapid pipeline development
- ✅ Comprehensive Operator Libraries
- ✅ Unlimited Data Scaling
- ✅ Pre-configured Sources & Targets
- ✅ End to end, real-time monitoring and alerting
- ✅ Bulk Replication

Cloud APIs — Applications — On-Prem Data Silos — Multi-Cloud Data Silos → Real-Time & Batch Data Extraction → **equalum** → Streaming ELT / Replication — Streaming / Batch ETL — CDC Event Sourcing → Data Lake — AI / Data Scienc — Data Warehouse — BI / Reporting — Event Hub — Application Integration

RESULTS

3x	15x	5x
Increase in Data Team Productivity	System Performance Improvement	Cost Savings

4+	1M	100K
# of tools to be replaced with Equalum	Events per second in a single cluster	Events per second CDC from single Oracle database

> **Equalum has redefined how we architect our system.**
> CURRENT EQUALUM CUSTOMER
> Senior Software Engineer
> Fortune 500 Retailer

> **As an overall package, Equalum is a very powerful data integration, migration and replication tool. It's got it all from end to end.**
> Joel Buck | Current Equalum Customer
